

Dataset Links

All sources are free. Every link below is drawn from the project brief and the master dataset reference. Click any blue label to open; the raw URL is shown beneath it for copy-paste.

CORE SOURCES — GROUND TRUTH

1 · SEC EDGAR XBRL — company facts / frames

Ground-truth income statement & balance sheet for the US filers (Estée Lauder, Tapestry, Capri); reconciliation benchmark for yfinance.

[Company Facts API \(example: EL, CIK 0001551152\)](#)

<https://data.sec.gov/api/xbrl/companyfacts/CIK#####.json>

[CIK ↔ ticker lookup map](#)

https://www.sec.gov/files/company_tickers.json

⚠ Requires a User-Agent: name email header; 10 requests/sec. Covers US filers only — the European/Asian houses are not here.

2 · Company URDs / Annual Reports (PDF)

Primary source for segment & geographic revenue for every house — especially the IFRS filers absent from EDGAR.

[LVMH — Universal Registration Document 2024](#)

<https://urd.lvmh.com/en/2024>

[Kering — Investor Relations / Finance](#)

<https://www.kering.com/en/finance/>

[Richemont — Investors](#)

<https://www.richemont.com/en/home/investors/>

[Hermès — Finance](#)

<https://finance.hermes.com/en/>

[Burberry — Investors](#)

<https://www.burberryplc.com/investors>

[Prada Group — Investor Relations](#)

<https://www.pradagroup.com/en/investor-relations.html>

⚠ Only LVMH's direct document URL is pinned in the brief. The other five are Investor-Relations entry points — open each and navigate to Annual Reports / Registration Documents for the specific PDF. Taxonomies differ per house → a documented mapping table is required.

3 · Damodaran NYU Stern datasets

Industry-average margins & valuation multiples — the benchmark you compare each house against.

[Current data page \(margin.xls, vebitda.xls, pedata.xls, psdata.xls; +Europe / +Global\)](#)

https://pages.stern.nyu.edu/~adamodar/New_Home_Page/datacurrent.html

⚠ URLs are overwritten each January — pin the exact file + download date so results stay reproducible.

4 · yfinance (Yahoo Finance)

Share price, market cap, and enterprise-value inputs for EV/Sales, EV/EBITDA and P/E; return series for all houses.

[yfinance library \(GitHub\)](#)

<https://github.com/ranaroussi/yfinance>

⚠ Fragile (HTTP 429) and non-US fundamentals are often empty — use it for *prices only*, fetch once, cache to Parquet, retry/back-off.

5 • Bain × Altagamma Luxury Study

Total-market denominator & segment/regional narrative context (used as context, not as a computed dataset).

[Altagamma — Studies & Research](https://altagamma.it/en/studi-e-ricerche/)

<https://altagamma.it/en/studi-e-ricerche/>

[Bain — Insights](https://www.bain.com/insights/)

<https://www.bain.com/insights/>

⚠ Free press releases / headline figures only — the full decks are partly gated.

■ OPTIONAL

6 • World Bank Open Data API

Macro context — correlate each house's regional revenue exposure with consumption / GDP per capita.

[Household final consumption per capita indicator \(JSON\)](https://api.worldbank.org/v2/country/all/indicator/NE.CON.PRVT.PC.KD?format=json)

<https://api.worldbank.org/v2/country/all/indicator/NE.CON.PRVT.PC.KD?format=json>

› No key; paginated. Swap the country code / indicator ID in the path as needed.

7 • Financial Modeling Prep

Convenience cross-check only — **not core**. SEC EDGAR + the URD PDFs are the ground truth.

[FMP developer docs](https://site.financialmodelingprep.com/developer/docs)

<https://site.financialmodelingprep.com/developer/docs>

⚠ Endpoints changed and the free plan is capped — treat as optional only.
