

Dataset Links

All sources are free. Every link below is drawn from the project brief and the master dataset reference. Click any blue label to open; the raw URL is shown beneath it for copy-paste.

CORE SOURCES — THE PANEL SPINE & ENRICHMENT

1 · Fortune 500 multi-year CSV — cmusam/fortune500 (GitHub)

Longitudinal spine → the DuckDB base fact table at company-year grain.

[Repository](#)

<https://github.com/cmusam/fortune500>

[Per-year CSV folder \(fortune500-YYYY.csv, 2005–2019 verified\)](#)

<https://github.com/cmusam/fortune500/tree/master/csv>

[Raw file example — fortune500-2019.csv](#)

<https://raw.githubusercontent.com/cmusam/fortune500/master/csv/fortune500-2019.csv>

⚠ The combined 2005–2021 file URL **404s** — use the per-year files, concatenate them, pin a commit SHA (not master), and mirror into data/raw/. This is a community reproduction of Fortune's proprietary rankings — cite it as such.

2 · Kaggle — Fortune 500 / 1000 datasets

Enrichment: sector, industry, HQ city/state, employees, market cap for recent year(s).

[Dataset search — “fortune 500”](#)

<https://www.kaggle.com/datasets?search=fortune+500>

[Kaggle API docs \(token setup\)](#)

<https://www.kaggle.com/docs/api>

⚠ Needs a free Kaggle account + API token. Prefer CC0 / CC BY datasets; pin the exact slug + version for reproducibility.

3 · Wikipedia — largest US companies by revenue

Current-year refresh & cross-check for the top ~100 firms.

[List of largest US companies by revenue](#)

https://en.wikipedia.org/wiki/List_of_largest_companies_in_the_United_States_by_revenue

⚠ Read with `pandas.read_html` and set a User-Agent. Only ~top 100 — use for recency & validation, not the full 500.

4 · SEC EDGAR XBRL — company facts / frames

Validation / stretch layer: audited Revenues, NetIncome, Assets for the public constituents.

[Company Facts API \(example: Walmart, CIK 0000104169\)](#)

<https://data.sec.gov/api/xbrl/companyfacts/CIK#####.json>

[CIK ↔ ticker lookup map](#)

https://www.sec.gov/files/company_tickers.json

⚠ Requires a User-Agent: name email header; 10 requests/sec. Covers public filers only — not private members like Cargill, Koch, or State Farm.

OPTIONAL — ENRICHMENT & BENCHMARK

5 · yfinance (Yahoo Finance)

Optional enrichment: sector / industry, employees, market cap for public firms.

[yfinance library \(GitHub\)](#)

<https://github.com/ranaroussi/yfinance>

› No key; fragile — cache to Parquet. Covers public filers only.

6 • Damodaran NYU Stern

Per-industry benchmark margins / return-on-capital to contextualize the Fortune sector aggregates.

[Current data page \(margin.xls, roc/roe files; +Europe / +Global\)](#)

https://pages.stern.nyu.edu/~adamodar/New_Home_Page/datacurrent.html

⚠ Industry taxonomy differs from Fortune's → a mapping table is needed. URLs are overwritten each January — pin the file + download date.
